

## delayed rainfall forecast

Submitted by diwu05 on Wed, 2013-04-17 08:04

Date:

Wednesday, April 17, 2013 - 00:00

### Instrument List:

- [Green](#)

Discussion:

Forecasted convection did not show up at IA until 12 UTC which is 4 hours later than the observations. Also the forecasted convection initially formed at the western boarder of IA instead of south as observed. This is also valid for 12 Z forecast on the previous day.
